## THE EFFECT OF INFLATION ON TRANSFER TAX EXEMPTIONS

## INFLATION'S EFFECT ON TRANSFER TAX EXEMPTIONS

- Current Exemption/Exclusion Amounts:
  - Estate Tax/Gift Tax Exemption: \$12,060,000
  - GST Tax Exemption: \$12,060,000
  - Annual Exclusion Amount: \$16,000
- On January 1 of each year, the estate, gift and GST tax exemption amounts, and the annual exclusion amount, are adjusted for inflation.
- High inflation environment, coupled with high exemption amounts, means massive inflation adjustments.

## INFLATION'S EFFECT ON TRANSFER TAX EXEMPTIONS (CONTINUED)

- Rev. Proc. 2022-38:
  - The estate, gift and GST tax exemption amounts will rise to \$12,920,000 per individual (\$25,840,000 for a married couple) in 2023, with an inflation adjustment of \$860,000.
  - The annual exclusion amount will raise up to \$17,000 per donee in 2023.
- IRC §1(f)(3) contains the formula the IRS uses to make annual inflation adjustments.
  - Includes a built-in time lag, so that it may take several years for real-world inflation to be reflected in higher exemption amounts.
  - Large inflation adjustments are expected through 2024.

## INFLATION'S EFFECT ON TRANSFER TAX EXEMPTIONS - CONTINUED

- The chart to the right shows the projected increase in the exclusion amount under three different scenarios:
  - The first scenario, indicated by the green line, assumes 6% inflation through at least August 2024
  - The second scenario, indicated by the purple line, assumes 4% inflation through at least August 2024
  - The third scenario, indicated by the red line, assumes inflation drops by 2%
- High Inflation: exemption amount increases by \$900,000 in 2024 and \$860,000 in 2025
- Medium Inflation: exemption amount increases by \$850,000 in 2024 and \$560,000 in 2025
- Low Inflation: exemption amount increases by \$610,000 in 2024 and \$270,000 in 2025

## VALUATION OPPORTUNITIES IN A DOWN MARKET

BLANKROME

7

## GIFTING

- Economic downturn presents an ideal time for making both annual exclusion and lifetime exemption gifts.
- Gifting while asset values are depressed allows clients to give away more of their property at a lower transfer tax cost.
- Assets whose values are expected to rebound are ideal candidates for gifting strategies, since all appreciation following the date of the gift will escape transfer taxation.
- The benefits of gifting in a down market must be weighed against the loss of a step-up in basis at death.

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

8

8

## ALTERNATE VALUATION DATE FOR ESTATES

- Generally, estate assets are valued as of the Decedent's date of death.
- If the Executor properly elects, estate assets may be valued as of the date six months after the Decedent's date of death.
- The alternate valuation date election is available only if:
  - A federal estate tax return is required to be filed;
  - The election reduces the value of the gross estate; and
  - The election reduces the estate and GST tax due on the property included in the estate.
- Once made, the election is generally irrevocable.
- The election applies to all property included in the estate and cannot be applied on an asset-by-asset basis.

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

9

9

## ALTERNATE VALUATION DATE FOR ESTATES - CONTINUED

- Timing and Manner of Making the Alternate Valuation Date Election
  - The election can be made by the Executor on a timely-filed federal estate tax return.
  - If the return is not timely-filed, the Executor can make the election on the first return filed after the due date, provided the return is filed no more than one year after the due date (including extensions).
  - If a return is filed within one year of the due date (including extensions), but the election is not made, the Executor can seek an extension of time under Regs. § § 301.9100-1 and 301.9100-3.
  - No election can be made after the 1-year grace period expires.

10

10

## LATE ALLOCATION OF GST EXEMPTION

- A down market presents a great opportunity for making late GST allocations to prior gifts.
- A late allocation of GST exemption is applied to the value of the trust assets on the date of the allocation, rather than the date of the gift.
- If asset values have declined since the date of the gift, making a late GST allocation will allow a trust to obtain a zero-inclusion ratio using less exemption.
- In the case of a gift to a “GST trust,” clients must opt-out of automatic allocation on a timely-filed Federal Gift Tax Return.

11

11

## EXERCISING POWER OF SUBSTITUTION

- Most intentionally defective grantor trusts give the settlor of the trust the power to take assets out of the trust and substitute in assets of equal value.
- In a down market, clients can strategically utilize the substitution power to swap assets at low values.
- Clients should substitute assets with greater appreciation potential with assets having less growth potential.

13

13

## QUALIFIED PERSONAL RESIDENCE TRUSTS

- A QPRT is an irrevocable trust that is used to transfer a personal residence to trust beneficiaries.
- QPRT lasts for a term of years, during which the grantor may continue to reside in the residence rent-free.
- After the term expires, the residence passes to the remainder beneficiaries (either outright or in further trust).
- If the grantor wishes to continue to reside in the residence after the QPRT term expires, the settlor may do so provided he or she pays fair market value rent to the remainder beneficiaries.
  - The payment of rent is not considered a gift to the remainder beneficiaries, and it reduces the grantor's taxable estate.
  - Continuation trusts at the end of a QPRT term are generally structured as grantor trusts, so the rent payments are income tax-free.

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

14

14

## QUALIFIED PERSONAL RESIDENCE TRUSTS - CONTINUED

- The initial transfer of the residence to the QPRT is a taxable gift of the value of the remainder interest, calculated at the §7520 rate.
- The higher the §7520 rate, the higher the value of the grantor's right to use the residence during the QPRT term, and the lower the value of the gift of the remainder interest.
- As the §7520 rate increases, the amount of the taxable gift decreases, so the QPRT is a more attractive strategy when interest rates are high.

15

15

## CHARITABLE REMAINDER TRUSTS

- A CRT lasts for a term of years or a lifetime, during which annual payments are made to one or more persons (which may include the grantor).
- After the term expires, the remaining assets of the CRT pass to a designated charity.
- There are two types of CRTS:
  - Charitable Remainder Annuity Trusts (CRATs): Pays a fixed income stream based on a percentage of the initial FMV of the gifted assets. The payment must be least 5% but no more than 50% of the initial FMV of the gifted assets must be paid out each year.
  - Charitable Remainder Unitrusts (CRUTs): Pays an income stream equal to a fixed percentage of the value of the trust's assets, which are revalued annually. The fixed percentage must be at least 5% but no more than 50% of the FMV of the trust assets based on the annual valuation.

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

16

16

## CHARITABLE REMAINDER TRUSTS - CONTINUED

- Upon the creation of the CRT, the grantor claims an income tax charitable deduction for the charitable portion of the gift.
- In order to pass IRS review, the charity must receive at least 10% of the initial FMV of the gifted assets upon the CRT's expiration.
- A CRT's remainder interest is valued at its present value using the §7520 rate.
- The higher the §7520 rate, the higher the value of the remainder interest, and the more likely the CRT is to meet the 10% remainder trust.
- A higher value of the remainder interest also means a higher charitable deduction is available to the grantor.

## GRANTOR TRUST RULES

- Grantor Trust Rules are located at IRC § § 671-679.
- IRC §671 provides that the income, deduction and credits of a grantor trust are reported on the grantor's personal income tax return.
- Please note that Pennsylvania's income tax law does not recognize grantor trust status. As a result, a grantor trust is a taxable entity for Pennsylvania income tax purposes.
- Important Terms
  - **Grantor:** Includes any person to the extent such person either creates a trust, or directly or indirectly makes a gratuitous transfer (i.e., a transfer not made for fair market value) of property to a trust.
  - **Related or Subordinate Party:** Includes the Grantor's spouse, ancestors, descendants, siblings, employee of the Grantor or company in which the Grantor's voting control is significant or in which the Grantor is an executive.
  - **Adverse Party:** A person: (i) who has a beneficial interest in a trust, (ii) whose interest in the trust is substantial; and (iii) whose interest would be adversely affected by the exercise or nonexercise of the power held by the Grantor or a nonadverse party.
  - **Nonadverse Party:** A person who does not meet the definition of an adverse party.

19

## GRANTOR TRUST TRIGGERS

- §673 – Right of Reversion: Reversionary interest in trust at the time of inception exceeds 5% of the trust's value.
- §674 – Power to Control Beneficial Enjoyment: Subject to certain exceptions, grantor or non-adverse party has control over distributions.
  - Exception for certain powers of independent trustees
- §675 – Administrative Powers: Depending on the power, such power is held by either (a) the grantor or a nonadverse party, or (b) any person in a nonfiduciary capacity.
  - Grantor's power to substitute assets is most often used to make a Grantor Trust.
- §676 – Power to Revoke: Grantor or nonadverse party has power to revoke the trust.
- §677 – Income for Benefit of Grantor: When income is, or in the discretion of the grantor or nonadverse party, may be, without the approval or consent of an adverse party: (a) distributed or accumulated for future distribution to the grantor or the grantor's spouse, or (b) applied to the payment of premiums on policies of insurance on the life of the grantor or the grantor's spouse.
- §678 – Person Other Than Grantor Treated as Substantial Owner: When a person other than the grantor has the power exercisable solely by him/her to vest the corpus or the income in the power holder.

## EXAMPLES OF UNINTENTIONAL GRANTOR TRUSTS

- **Example #1 – Grantor's Spouse is a Trustee**
  - G creates an irrevocable trust for the benefit of his three children A, B and C.
    - The trust instrument provides that the trustees may make discretionary distributions of income and/or principal to any one or more than one of A, B and C.
  - G's spouse, S, and G's friend, F, are serving as co-trustees of the trust and F is not related or subordinate to G.
  - The trust instrument does not contain a power of substitution or a power to add charitable beneficiaries.
- How to "turn off" grantor trust status?
  - S must be removed as a co-trustee of the trust.
  - The exception under IRC §674(c) applies only if none of the trustees is the grantor.
    - For purposes of IRC §674 (c), the term "grantor" includes the grantor's spouse (within the meaning of IRC §672(e)(2)).

21

21

## EXAMPLES OF UNINTENTIONAL GRANTOR TRUSTS - CONTINUED

- **Example #2 – Power to Control Beneficial Enjoyment is Held by a Nonadverse Party:**
  - G creates an irrevocable trust for the benefit of his daughter, A.
    - The trust instrument provides that the trustee may make discretionary distributions of income and/or principal to A during her lifetime.
  - G's brother, B, is serving as the sole trustee of the trust.
  - The trust instrument does not contain a power of substitution or a power to add charitable beneficiaries.
- How to “turn off” grantor trust status?
  - Add a trustee who is not a related or subordinate party to serve with B (IRC §674(c)); or
  - Modify the dispositive provisions so that B may only make discretionary distributions for health, education, maintenance or support (IRC § § 674(b)(5) and 674(d)).

## EXAMPLES OF UNINTENTIONAL GRANTOR TRUSTS - CONTINUED

- **Example #3 – Grantor's Spouse is a Beneficiary:**
  - G creates an irrevocable trust for the benefit of his spouse, S, and his three children, A, B and C.
    - The trust instrument provides that during the lifetime of S, the trustee may make discretionary distributions of income and/or principal to any one or more than one of S, A, B, and C.
  - G's friend, F, is serving as sole trustee of the trust and F is not related or subordinate to G.
  - The trust instrument does not contain a power of substitution or a power to add charitable beneficiaries.
- How to “turn off” grantor trust status?
  - Add an adverse party (e.g., A, B and/or C) to serve as a co-trustee of the trust and require that any discretionary decisions to make distributions to S or to accumulate income for S's benefit must be approved by the adverse party (IRC §677(a)).

23

23

## TAX TREATMENT OF SLATS

- A SLAT is an irrevocable trust created by one spouse for the benefit of the other.
  - This typically results in treatment as a grantor trust for income tax purposes under IRC §677.
- In order to “turn off” grantor trust status of a SLAT under IRC §677, there must be an “adverse party” who must consent before any distributions are made to the spouse.
- An “adverse party” is any person:
  - Who has a beneficial interest in the trust (including a power of appointment over the trust);
  - Whose interest is substantial; and
  - Whose interest would be adversely affected by the exercise or nonexercise of the power held by the grantor or a nonadverse party (IRC §672(a)).

25

25

## TAX REIMBURSEMENT OF GRANTORS

- Rev. Rul. 2004-64
  - When the grantor of a trust, who is treated as the owner of such trust under the grantor trust rules, pays the income tax attributable to the trust's assets, the grantor is not treated as making a gift of the amount of the tax to the trust beneficiaries.
  - A trustee's discretionary authority (whether or not exercised), under the trust instrument or local law, to reimburse the grantor for the grantor's income tax liability attributable to trust assets will not, by itself, cause inclusion in the grantor's federal gross estate.
    - Inclusion may result if such discretion is coupled with other facts indicating control by the grantor, including: a pre-existing arrangement with the trustee, power to remove the trustee and appoint the grantor as replacement, or local law subjecting the trust assets to the claims of the grantor's creditors.
  - Inclusion will result if local law or the trust instrument mandates that the grantor be reimbursed for income taxes
- All grantor trusts should include language negating any right of reimbursement provided under applicable local law.

## TAX REIMBURSEMENT OF GRANTORS – PENNSYLVANIA

- Pennsylvania case law suggests that a grantor may have a right of reimbursement.
  - *French Trust*, 23 Fid. Rep. 296, 61 D.&C. 654 (O.C. Philadelphia 1963): The trustee of an irrevocable trust distributed principal to the grantor to reimburse her for taxes paid on capital gains. The Court held that “[e]quity similarly requires that although the Internal Revenue Code and Regulations impose upon the settlor-beneficiary the income tax liability on capital gains realized and retained by the trustees, the **principal** of the trust should be applied in relief of such tax.” (emphasis in original)
  - *Mathey Trust*, 1 Fid. Rep. 2d 96, 19 D.&C.3d 43 (O.C. Montg. 1981): The Court approved the reformation of an irrevocable trust to direct principal distributions to the grantor-beneficiary to reimburse the grantor for taxes paid on capital gains. Citing *French Trust*, the Court held “[a]s between the trust and the settlor, however, equity requires that the fund bear the ultimate responsibility for the tax.”
- Discretionary power to reimburse the grantor for taxes does not expose trust assets to creditors (20 Pa. C.S §7745(2)).

## TAX REIMBURSEMENT OF GRANTORS – NEW YORK

- The trustee of an express trust, unless otherwise provided in the trust instrument, may, from time to time, pay from principal to the creator of such trust an amount equal to any income taxes on any portion of the trust principal with which he is charged (EPTL § 7-1.11(a)).
  - Note that the default reimbursement power is limited to capital gains from the principal of the trust.
  - The reimbursement power can be expanded in the trust instrument to include taxes on income.
- Discretionary power to reimburse the grantor for taxes does not expose trust assets to creditors (EPTL §7-3.1(d)).

28

28

## TAX REIMBURSEMENT OF GRANTORS – NEW JERSEY

- N.J.S.A. §3B:11-1b.:
  - Modeled after EPTL §7-3.1(d)
  - “A trustee's discretionary authority to pay trust income or principal to the creator of such trust in an amount equal to the income taxes on any portion of the trust principal chargeable to the creator shall not be considered to be a right of the trust creator to receive trust income or principal within the meaning of subsection a. of this section. The trust creator shall not be considered to have the right to receive income or principal of the trust solely because the trustee is authorized under the trust instrument or any other provision of law to pay or reimburse the creator for any tax on trust income or trust principal that is payable by the creator under the law imposing such tax or to pay any such tax directly to the taxing authorities. No creditor of a trust creator shall be entitled to reach any trust property based on the discretionary powers described in this subsection.”
- Reimbursement must be authorized under the trust instrument.

## TAX REIMBURSEMENT OF GRANTORS – FLORIDA

- Unless otherwise prohibited in the trust instrument, the trustee of a grantor trust may reimburse, or pay the grantor's income tax liability directly to the taxing authority, related to the trust (Fla. Stat. § 736.08145(1)(a)).
  - The power of reimbursement may only be exercised by a trustee who is not a beneficiary or an individual related or subordinate to the settlor (Fla. Stat. § 736.08145(3)).
- Discretionary power to reimburse the grantor for taxes does not expose trust assets to creditors (Fla. Stat. § 736.0505(c)).

## EXTENDING TIME FOR PORTABILITY ELECTION, AGAIN

- Under Section 2010(c)(5)(A), a portability election is effective only if made on an estate tax return that is filed within the time prescribed by law (including extensions) for filing such return.
- The IRS previously issued Rev. Proc. 2017-34, which provided a simplified method for the Executor of a decedent's estate that did not meet the threshold for filing an estate tax return to elect portability under Section 2010(c)(5)(A) within two years after the decedent's death.
- To reduce the number of requests for private letter rulings, the IRS issued Rev. Proc. 2022-32 which extends the two-year period to five years.

## EXTENDING TIME FOR PORTABILITY ELECTION, AGAIN - CONTINUED

- Rev. Proc. 2022-32
  - Section 9100 relief to make a late portability election may be granted if the following requirements are met:
    - Decedent was survived by a spouse, died after December 31, 2010 and was a citizen of the United States;
    - The Executor is not required to file an estate tax return under Section 6018(a);
    - The Executor has not filed a timely estate tax return; and
    - The Executor files a complete and properly prepared Form 706 by the fifth annual anniversary of the Decedent's death.
  - An extension of time to elect portability does not extend the period during which the surviving spouse or his/her estate may make a claim for credit or refund under Section 6511(a).

## GRAT RETROACTIVELY DISQUALIFIED FOR INTENTIONALLY LOW VALUATION

- CCA 202152018

- IRS held that taxpayer's reliance on valuation of shares made seven months prior to funding a GRAT was not reasonable given potential sale of company at a higher price.
- Timeline:
  - At the end of Year 1: Donor (D) contacted two Investment Advisors to find a possible outside buyer for the Company which D owned.
  - Six Months Later: The Investment Advisors presented D with an offer from each of five corporations (the "Corporations").
  - Three Days Later: D created a two-year GRAT that required annuity payments to D of a sum equal to a fixed percentage of the initial FMV of the trust property.
    - D funded the GRAT with shares of the Company, the value of which was determined based on an appraisal dated approximately seven months prior, the purpose of which was to satisfy the reporting requirements for a nonqualified deferred compensation arrangement.
  - Three Months Later: D received final offers from the Corporations, four of whom had raised their offers. Thereafter, D gave shares of the Company to a CRT, valuing the shares, per a qualified appraisal, at three times the value used for the GRAT.
  - Three Months After Receiving the Final Offers and Several Weeks After Funding the CRT: D accepted one of the offers for some of the outstanding shares at the value used in funding the GRAT.
  - Several Years Later (approximately six months after the end of the two-year GRAT term): the purchasing corporation purchased the balance of the Company's shares at a price-per-share almost four times the value used for the GRAT.

34

## GRAT RETROACTIVELY DISQUALIFIED FOR INTENTIONALLY LOW VALUATION - CONTINUED

- CCA 202152018

- Holding:
  - GRAT annuity was not a qualified interest under Section 2702 because the Trustee made the payments based on an intentionally low valuation of the Company's shares.
  - On the date the GRAT was funded, the hypothetical willing buyer would have been aware of the ongoing negotiations and anticipated that the Company's share value was above the valuation amount.
- Observations:
  - The IRS did not allow the Trustee of the GRAT to take advantage of the "savings clause" feature authorized by the GRAT regulations, which allow basing the annuity payments on a percentage of the initial FMV of the trust assets, as finally determined for federal tax purposes (Reg. § 25.2702-3(b)(1)(ii)(B)).
    - If the trust assets are initially undervalued, the annuity payments are automatically adjusted based on the finally determined FMV.
  - In order to avoid similar issues, a new appraisal should always be obtained in connection with making a gift to a GRAT.

## GAINS, ATTRIBUTES OF GAINS, AND TAXPAYERS

### Eligible Gains

- Limited to gains treated as *capital gains* for Federal income tax purposes
  - Recognized before January 1, 2027 (need legislation to expand scope of program)
  - Multiple elections can be made for various parts of a single source of gain (important planning)
- Gains from offsetting-position transactions (e.g., straddles) do not qualify
- Impact of capital gains at death (estate as eligible taxpayer)

44

44

# QOF CONTRIBUTIONS

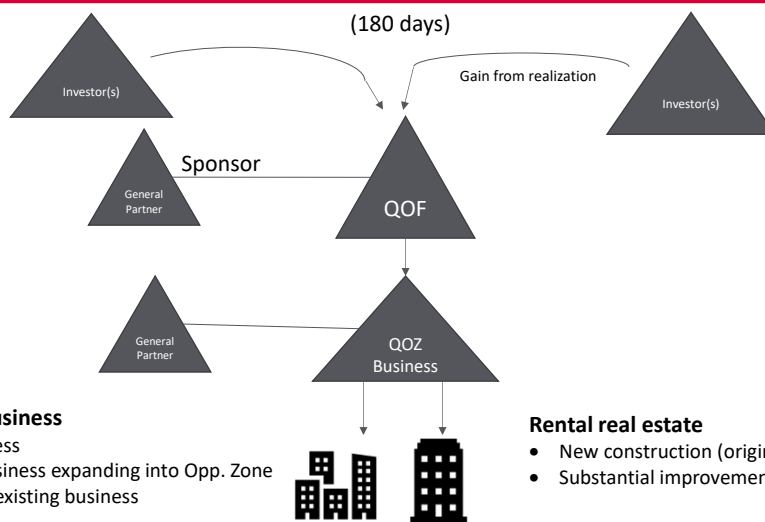

## QOF Contributions

- Investments in QOFs must be cash, or property, and cannot include services
- Property contributions – deferral election is limited to tax basis of property contributed
- Value received by an investor for appreciated property or provision of services is treated as property contributed for which an election is not made
  - Results in a mixed funds investment
- Distributions, especially within two years of a capital contribution, can be deemed disguised sales of partnership interests and not qualify for a deferral of gain or other opportunity zone benefit (inclusion event)

45

# STRUCTURE

### Operating Business

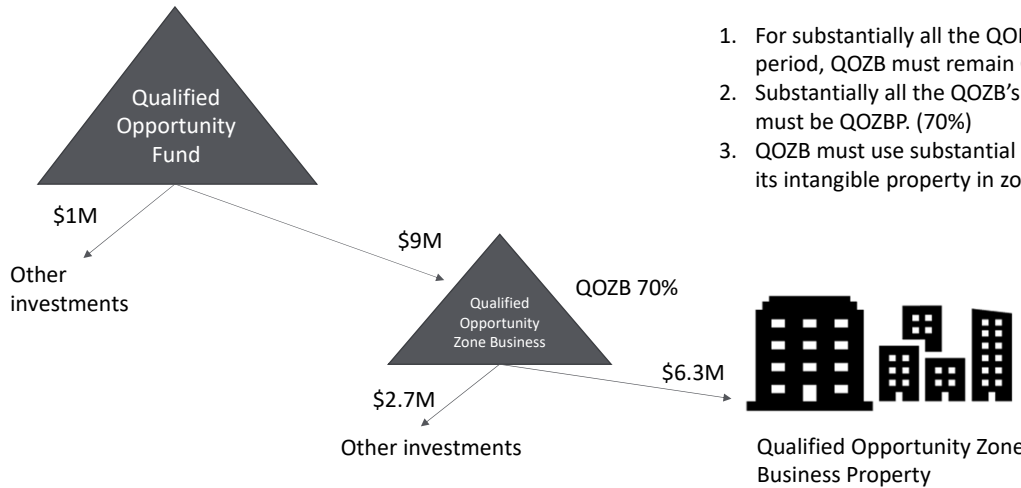

- New business
- Existing business expanding into Opp. Zone
- Improving existing business

### Rental real estate

- New construction (original use commences with Taxpayer)
- Substantial improvement (100%) of basis

46

## TYPICAL STRUCTURE – \$10M INVESTMENT

1. For substantially all the QOF holding period, QOZB must remain QOZB
2. Substantially all the QOZB's property must be QOZBP. (70%)
3. QOZB must use substantial portion of its intangible property in zone.

47

47

## QUALIFIED OPPORTUNITY ZONE BUSINESSES (QOZB)

A trade or business in which substantially all (70% per Final Regulations) of the tangible property owned or leased by the taxpayer is qualified opportunity zone business property (QOZBP) and:

At least 50% of  
Income derived from  
Active Conduct

Substantial portion, at least  
40%, of intangible property  
used in active conduct of  
business

< 5% average aggregate  
unadjusted basis of property is  
nonqualified financial property

\*Non-qualified financial property is, generally, debt, stock, partnership interests, options, futures contracts, forward contracts, warrants, etc. that do not relate to the OZ investment.

\*\*Active conduct of business includes the ownership and operation (including leasing) of real property but merely entering into a NNN lease is not the active conduct of a business, although typical in industrial warehouse selling.

## QUALIFIED OPPORTUNITY ZONE BUSINESS PROPERTY (QOZBP)

- √ Tangible property used in a trade or business
  - √ Acquired by purchase from an unrelated party (20% standard) after December 31, 2017, so underlying property may be tainted
  - √ During substantially all of holding period, substantially all the use is in a QOZ – now defined as 70%
  - √ Original use in the QOZ commences with the taxpayer (PIS date for depreciation or amortization purposes)
- OR
- √ Taxpayer substantially improves the property
    - √ During any 30-month period after acquisition, additions to basis exceed an amount equal to the adjusted basis of such property/building at the beginning of such period

49

## CERTIFICATION OF QOF

- Entity classified as a corporation or partnership for Federal tax purposes is eligible – LLCs taxed as corporations or partnerships OK
- Self-certification using Form 8996
  - Identify first taxable year the entity wants to be a QOF
  - Identify the first month the entity wants to be a QOF
  - Listing by census tract of all property directly owned
  - Listing by census tract of investments in QOZBs and property owned by QOZBs
- Investments received before “first month” not eligible for deferral
- QOFs have 6-months to invest proceeds, even if QOF investment is made during second half of QOF tax year
- Penalty doesn’t apply to months before the “first month”
- No legal barrier to pre-existing entities becoming a QOF (or QOZB)

50

50

## WORKING CAPITAL SAFE HARBOR

- QOZBs are allowed a safe harbor to treat working capital as property actively used in a trade or business for a period of up to 31 months (possibly 62 months), if:
  - There is a written plan for the development of a trade or business in a qualified opportunity zone,
  - There is written schedule consistent with the ordinary business operations of the business that the property will be used within 31-months, and
  - The business is substantially consistent with the writing and schedule. Delay waiting for governmental action not counted for 31-month period. Taxpayers required to retain any written plan in their records.
  - Modification is essential over the period; however, no real guidance as to timing.

51

51

## WORKING CAPITAL SAFE HARBOR - CONTINUED

- **Federally declared disasters.** If the qualified opportunity zone business is located in a qualified opportunity zone within a federally declared disaster (as defined in section 165(i)(5)(A)), the qualified opportunity zone business may receive not more than an additional 24 months to consume its working capital assets, as long as it otherwise meets the requirements of paragraph (d)(3)(v) of this section.
- **Ability of a single business to benefit from more than a single application of the safe harbor.** A business may benefit from multiple overlapping or sequential applications of the working capital safe harbor, provided that each application independently satisfies all of the above requirements.

52

52

## WORKING CAPITAL SAFE HARBOR - CONTINUED

- Single most important concept: a very valuable tool
- The final regulations provide a 62-month safe harbor rather than the simple 31-month safe harbor (as was provided under the proposed regulations applicable to OZs).
  - Assuming certain conditions are met, a QOZB can choose to apply a second 31-month working capital safe harbor to tangible property for a maximum 62-month period. That is, a QOZB can choose to “piggyback” two successive 31-month safe harbors.
- A QOZB must receive multiple cash infusions during the initial 31-month period to qualify for the maximum 62-month safe harbor. The QOZB must satisfy two conditions:
  1. the subsequent cash infusion must be independently covered by an additional working capital safe harbor, and
  2. the working capital safe harbor plan for the subsequent cash infusion must form an integral part of the working capital safe harbor plan that covered the initial cash infusion.

53

53

## WORKING CAPITAL SAFE HARBOR - CONTINUED

- 2021 Corrective Amendment provides that for “start-up” businesses only (which are not defined) that meet the working capital safe-harbor referenced above, said entity would satisfy the 70-30 “substantiality” test during such period. **Query:** does the 50 percent gross income requirement still apply? I think not. Secondly, how is a start-up business defined when the QOZB is engaged in multiple businesses or development activities? When may the businesses be combined?
- Merger consideration – if one of the QOZB businesses can’t meet the 70-30 test.

54

54

## PART II: FOR PLANNING PURPOSES: COMPARISON OF SECTION 1031 VERSUS OZ TAX BENEFITS

- OZBP investments are not restricted to real estate; available to all capital gains, such as hedge funds
- However, Section 1031 deferral relate only to real estate with permanent basis step-up at death.
- Under Section 1031, the investment needs to cover the “gross” sales proceeds; in OZ only deal with the “capital gain” portion. Don’t need to offset by capital loss.

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

55

55

## FOR PLANNING PURPOSES: COMPARISON OF SECTION 1031 VERSUS OZ TAX BENEFITS

- While OZ allows permanent basis step-up (without the need to die if held for ten years).
- Good strategy in the event if there is a “busted” 1031; an OZ option may be available assuming the 180-day period has not expired.
- QOF or QOZB may do a 1031 rollover, but need to meet the “substantial improvement test” which may be difficult to satisfy at a later point.

57

57

## APPLICATION FOR TAX EXEMPT STATUS UNDER IRC § 501(C)(3)

- 501(c)(3)s must file either Form 1023, Application for Recognition of Exemption, or Form 1023-EZ, Streamlined Application for Recognition of Exemption, with the IRS
  - Both Form 1023 and 1023-EZ are filed electronically at [www.pay.gov](http://www.pay.gov)
- Form 1023-EZ is only available to small organizations
  - Small = annual gross receipts over the next 3 years will not exceed \$50,000 and FMV of all assets less than \$250,000
  - Even small organizations may be better served filing the “long” Form 1023
    - *E.g.*, organizations that intend to apply for grants from private foundations
- If Form 1023/1023-EZ is filed within 27 months of formation or funding, tax exempt status will be retroactive to the date of formation or funding
  - If not filed within 27 months, tax exempt status will be retroactive to the date of filing

## FORM 1023 VS. FORM 1023-EZ – FUNDAMENTAL DIFFERENCES

### Form 1023

- 26 pages
- \$600 filing fee
- Requires narrative responses and attachments, including:
  - Copies of organizational documents
  - Narrative description of activities
  - Budget of revenue and expenses

### Form 1023-EZ

- 3 pages
- \$275 filing fee
- Must meet the certain criteria, including projected gross receipts and asset values
- Consists mostly of “check the box” attestations

59

59

## FORM 1023 VS. FORM 1023-EZ – PROCESSING TIMES

- The time it takes the IRS to process a Form 1023 versus a Form 1023-EZ is drastically different
- The table to the right was taken from the IRS website and last updated on October 17, 2022
- It is clear that the IRS is able to process EZ forms much faster than standard Form 1023s

Form Number	Your application has not been assigned if postmarked after this date:
Form 1023-EZ	October 4, 2022
Form 1023	March 2, 2022

60

## FORM 1023-EZ – CHANGES MAY BE COMING

- The Form 1023-EZ has been criticized for allowing potentially ineligible organizations to obtain tax-exempt status with little pushback from the IRS
- On September 8, 2022, Sunita Lough, Commissioner of the IRS's Tax Exempt and Government Entities Division, posted "A Closer Look" article, "Streamlining the 1023—A Success Story"
  - To address the risk associated with a streamlined application, the IRS maintains a pre-determination review process and a post-determination compliance program
  - In 75% of post-determination exams, the IRS did not need to propose any changes to the organization's operations
    - Better outcome than in organizations filing the long Form 1023, where no changes are needed in only 67% of organizations

61

61

## FORM 1023-EZ – CHANGES MAY BE COMING (CONTINUED)

- On October 3, 2022, Treasury Inspector General for Tax Administration ("TIGTA") released Audit Report No. 2023-10-001
  - "[T]he information provided on the Form 1023-EZ is insufficient to make an informed determination about tax-exempt status and does not educate applicants about eligibility requirements for tax exemption"
  - TIGTA was able to obtain tax-exempt status for four of five nonexistent organizations
  - TIGTA identified inaccuracies in online guidance for the Form 1023-EZ
- TIGTA's Recommendations to the IRS: (1) revise the activities description narrative in the Form 1023-EZ, (2) assess whether it is feasible to have EZ applicants attach their organization documents to the Form, (3) notify applicants when additional time is needed to process EZ forms, and (4) update online guidance with accurate information
  - The IRS agreed with recommendations (2) and (4)
  - IRS will consider recommendation (3)
    - Sunita Lough stated in her article: "[W]e will consider adding the organizational documents to Form 1023-EZ"
  - The IRS does not believe more detailed activity descriptions are necessary to make determination decisions
- Form 1023-EZ is not going anywhere, though changes may be coming

62

62

## CONSIDERATIONS WHEN FILING FORM 1023

- Given the long processing times for the Form 1023, organizations should err on the side of providing greater detail to avoid further delays in responding to IRS information requests
- In our experience, certain items on the Form 1023 are subject to greater IRS scrutiny than others, including:
  - The narrative description of the organization’s activities (Part IV, Line 1)
  - Whether the organization will purchase/sell goods, services or assets from or to “disqualified persons” (Part V, Line 4)
  - Whether the organization will enter into contracts with “disqualified persons” (Part V, Line 5)

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

63

63

## FORM 1023 – PART IV, LINE 1

- Describe completely and in detail your past, present, and planned activities. Do not refer to or repeat the purposes in your organizing document.
- For each past, present, or planned activity, include information that answers the following questions:
  - What is the activity?
  - Who conducts the activity?
  - Where is the activity conducted?
  - What percentage of your total time is allocated to the activity?
  - How is the activity funded (for example, donations, fees, etc.) and what percentage of your overall expenses is allocated to this activity?
  - How does the activity further your exempt purposes?

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

64

64

## FORM 1023 –NARRATIVE DESCRIPTION OF ACTIVITIES

- The narrative of activities is a critical part of the Form 1023 – it is whether the organization can “make its case” to the IRS for exemption
- Frequently, applicants complete the activities narrative by simply stating their mission (or restating the purposes in the organizing document) and providing a short description of their programs
  - May lead the IRS reviewing agent to believe that the IRS does not have sufficient information to make an exemption determination, which can cause delays or denial of exemption
  - The Form 1023 is a public document, and an incomplete narrative of activities may lead to skepticism from prospective funders and supporters
- If the organization has a website, assume that the IRS will be reviewing it for consistency with the narrative of activities

BLANKROME

© 2022 BLANK ROME LLP. ALL RIGHTS RESERVED. PLEASE CONTACT BLANK ROME FOR PERMISSION TO REUSE.

65

65

## FORM 1023 –NARRATIVE DESCRIPTION OF ACTIVITIES (CONTINUED)

- It is important to respond to each of the questions presented:
  - **What is the activity** - If the organization is still working out exactly what its activities will be, err on the side of overinclusion and use conditional language (*e.g.*, Applicant may conduct the following program/activity...)
  - **Who conducts the activity** – The answer to this will usually be a combination of the directors/trustees, officers, employees and/or volunteers
  - **Where is the activity conducted** – If the activities will initially be conducted in a certain area, but are expected to expand in the future, state that
  - **What percentage of your total time is allocated to the activity** – Make sure to respond to this and estimate if needed
  - **How is the activity funded (for example, donations, fees, etc.) and what percentage of your overall expenses is allocated to this activity** – If the organization’s fundraising program is not finalized, state that and mention any anticipated funding sources. This response should agree with the financial data provided later in the Form 1023
  - **How does the activity further your exempt purposes** – Citing to authority can be helpful but is not required

## FORM 1023 – PART V, LINES 4 AND 5

- (4) Do you or will you purchase or sell any goods, services, or assets from or to: (i) any of your officers, directors, or trustees; (ii) any family member of any of your officers, directors, or trustees; (iii) any organizations in which any of your officers, directors, or trustees are also officers, directors, or trustees, or in which any individual officer, director, or trustee owns more than a 35% interest; (iv) your highest compensated employees; or (v) your highest compensated independent contractors? If “Yes,” describe any such transactions that you made or intend to make, with whom you make or will make such transactions, how the terms are or will be negotiated at arm’s length, and how you determine you pay no more than fair market value or you are paid at least fair market value.
- (5) Do you or will you have any leases, contracts, loans, or other agreements with: (i) your officers, directors, or trustees; (ii) any family member of any of your officers, directors, or trustees; (iii) any organizations in which any of your officers, directors, or trustees are also officers, directors, or trustees, or in which any individual officer, director, or trustee owns more than a 35% interest; (iv) your highest compensated employees; or (v) your highest compensated independent contractors? If “Yes,” describe any written or oral arrangements that you made or intend to make, with whom you have or will have such arrangements, how the terms are or will be negotiated at arm’s length, and how you determine you pay no more than fair market value or you are paid at least fair market value.

67

67

## FORM 1023 – TRANSACTIONS WITH “DISQUALIFIED PERSONS”

- What’s the rationale behind these questions?
  - The IRS is trying to gauge how the organization will handle excess benefit transactions and, in the case of private foundations, acts of self-dealing
- Common scenarios where these issues arise:
  - **Shared Services Agreements:** Nonprofits frequently enter into Shared Services Agreements with other organizations that have common directors, officers, and/or employees (a “related organization”) and that address the sharing of office space, equipment, and administrative services (*e.g.*, accounting, HR, and IT)
  - **Start-Up Loans:** In order to help a newly-formed nonprofit cover start-up costs, a founder or director may loan funds to the organization
  - **Licensing Agreements:** A nonprofit may receive a license to use certain intellectual property owned by a related organization

BLANKROME

68

68

## FORM 1023 – TRANSACTIONS WITH “DISQUALIFIED PERSONS” (CONTINUED)

- Response considerations:
  - Gather as much information as possible from the client regarding any known contracts/transactions
    - *E.g.*, agreement terms including pricing and who will be negotiating the arrangement on behalf of each party
  - The organization should comply with all policies it has in place that are intended to deal with excess benefit and self-dealing issues (*e.g.*, Conflict of Interest Policy and Compensation Policy)
    - Reference that such policies will be complied with in connection with entering into a proposed transaction/contract
  - Consider attaching representative copies of agreements mentioned in the response to Form 1023
  - Remember that the self-dealing rules are often counterintuitive
    - Even transactions that seemingly benefit a private foundation can be acts of self-dealing

## OFFSHORE VOLUNTARY DISCLOSURE PROGRAM

- **\*\*OLD PROGRAM THAT CLOSED ON 9/28/18\*\***
  - Penalty between 27.5% and 50% - depends on where the taxpayer banked and whether the taxpayer acted willfully.
  - Look back period of 8 years.
  - Penalty is on non-compliant assets (e.g., foreign accounts, income producing real estate, artwork purchased with funds escaping U.S. taxation, foreign businesses, etc.)
  - Best Option for:
    - FBARs and information returns not filed.
    - Significant taxable income to pick up.

73

73

## NEW VOLUNTARY DISCLOSURE PRACTICE (VOLUNTARY DISCLOSURE RECEIVED AFTER 9/28/18)

- In general:
  - Six-year disclosure period
  - Disclosure period will require examinations of the most recent six tax years.
  - Disclosure and examination periods may:
    - (1) be longer if the voluntary disclosure is not resolved by agreement;
    - (2) be shorter if the noncompliance is less than six years; and
    - (3) if the taxpayer wants to expand beyond six years to clean up a prior issue (e.g., on a sale of the company).
- Taxpayers must submit all required returns and reports for the disclosure period.

74

74

## NEW VOLUNTARY DISCLOSURE PRACTICE (VOLUNTARY DISCLOSURE RECEIVED AFTER 9/28/18)

- Penalties:
  - Absent special circumstances, the civil penalty under I.R.C. § 6663 for fraud or the civil penalty under I.R.C. § 6651(f) for the fraudulent failure to file income tax returns will apply to the one tax year with the highest tax liability. This penalty can be as high as 75% of the underpayment of tax.
  - Willful FBAR penalties will be asserted in accordance with existing IRS penalty guidelines under IRM 4.26.16 and 4.26.17. This is generally a 50% penalty on the highest account balance over the preceding 6 years.
  - A taxpayer is not precluded from requesting the imposition of accuracy related penalties under I.R.C. § 6662 instead of civil fraud penalties or non-willful FBAR penalties instead of willful penalties.

75

75

## NEW VOLUNTARY DISCLOSURE PRACTICE (VOLUNTARY DISCLOSURE RECEIVED AFTER 9/28/18)

- Penalties (continued):
  - Given the objective of the voluntary disclosure practice, granting requests for the imposition of lesser penalties is expected to be exceptional. Where the facts and the law support the assertion of a civil fraud or willful FBAR penalty, a taxpayer must present convincing evidence to justify why the civil fraud penalty should not be imposed.
  - Penalties for the failure to file information returns will not be automatically imposed.
  - Taxpayers retain the right to request an appeal with the Office of Appeals.

76

## NEW VOLUNTARY DISCLOSURE PRACTICE (VOLUNTARY DISCLOSURE RECEIVED AFTER 9/28/18)

- Process:
  - Preclearance: complete and submit Part I of Form 14457, Voluntary Disclosure Practice Preclearance Request and Application.
    - Disclose more during preclearance than taxpayers historically have been required to disclose. Previously it was just basic identifying information and now much more information is required to be disclosed.
    - As part of this information submission process taxpayers are voluntarily offering information to the IRS before knowing if they are eligible to make a voluntary disclosure.
    - IRS can ultimately use this information against a taxpayer if not accepted into the program.
  - Upon receipt of preclearance confirmation, submit Part II of Form 14457 within 45 days or submit a written request for additional time.
  - Submit all required returns and reports for the disclosure period.

**FORM 14457-SS**

These instructions apply to Form 14457-SS, which is used to report the following information:

- 1. The amount of Social Security tax withheld from an employee's wages.
- 2. The amount of Social Security tax paid by the employer.
- 3. The amount of Social Security tax paid by the employee.
- 4. The amount of Social Security tax paid by the self-employed individual.

The instructions for Form 14457-SS are as follows:

**Who Must File.** An employer who has withheld Social Security tax from an employee's wages, or an employer who has paid Social Security tax on behalf of an employee, must file Form 14457-SS for each employee for whom Social Security tax was withheld or paid. A self-employed individual who has paid Social Security tax on their own behalf must file Form 14457-SS for themselves.

**When to File.** Form 14457-SS must be filed by the employer or self-employed individual on or before the due date of the employer's or self-employed individual's federal income tax return for the year in which the tax was withheld or paid.

**Where to File.** Form 14457-SS must be filed with the Internal Revenue Service (IRS) at the address shown on the form.

**How to File.** Form 14457-SS can be filed electronically or by mail. If filed by mail, the form must be accompanied by a payment for the tax.

**Penalty for Late Filing.** A penalty will be assessed for the late filing of Form 14457-SS. The penalty is based on the amount of tax withheld or paid and the number of days the form is late.

**Additional Information.** For more information about Form 14457-SS, see the instructions for Form 14457-SS.

## Taxation of Digital Assets

Per the IRS, Digital Assets include:

- Virtual currencies such as Bitcoin or Ether
- Stablecoins such as Tether and USDC
- Non-Fungible Tokens (NFTs)

Common digital assets transactions taxed as **capital gains** (taxed as property subject to capital gains rates):

- Sale of digital assets for fiat
- Exchange of digital assets for another digital asset
- Exchange of digital assets for property
- Use of digital assets to pay for goods or services

Common digital assets transactions taxed as **ordinary income**:

- Mining or staking cryptocurrency
- Payments received in the form of digital assets

**Non-taxable** digital assets transactions:

- Buying and holding digital assets
- Transferring digital assets between exchanges or wallets

SKYBRIDGE CAPITAL | 1

116

## Tax reporting – Digital Assets Transactions

Below is an excerpt from the draft Form 1040 for tax year 2022 (instructions not released):

The image shows a portion of the 2022 U.S. Individual Income Tax Return form. The 'Digital Assets' section is highlighted with a red box. The question asks: 'At any time during 2022, did you (or receive (as a reward, award, or payment for property or services) or (as an exchange, gift, or otherwise dispose of a digital asset (or a financial interest in a digital asset)? (See instructions.)' The response options are 'Yes' and 'No'.

The IRS first required taxpayers to answer a question about digital asset/virtual currency transactions in 2020.

Key changes from previous Form 1040:

- The IRS appears to have expanded the question to encompass transactions involving all forms of digital assets and earned rewards.

SKYBRIDGE CAPITAL | 2

117

## Tax reporting – Digital Assets Transactions

Infrastructure Investment and Jobs Act (“Infrastructure Bill”):

- Beginning with tax year 2023, cryptocurrency exchanges and custodians will be required to collect taxpayer information from customers, to properly issue Form 1099s.

Many widely used exchanges are already sending Form 1099s to customers, including:

- Coinbase
- Binance
- Gemini
- Kraken
- Bitstamp
- Crypto.com

## Wash Sale Rule – Digital Assets

Wash Sale – occurs when you sell or trade a security at a loss and then acquire a substantially identical security within 30 days.

Wash Sale Rule – Digital Assets

- The IRS currently defines digital assets as property, not securities.
- As a result, the wash rule doesn't technically apply to digital assets.

Build Back Better Bill

- Included language applying wash sale rules to digital assets but was not enacted.
- Future legislation may propose that digital assets be subject to wash sale rules.

## CONSIDERATIONS – CONVENIENCE OF THE EMPLOYER

- New York's "Convenience of the Employer" Test
  - If a nonresident is employed in New York, days worked outside the State are considered non-New York workdays only if the nonresident worked outside the State out of necessity rather than convenience.
    - Similar rules in Pennsylvania, Delaware and Nebraska.
- New York's "Bona Fide Office" Safe Harbor
  - Home office can qualify as a "bona fide employer office" if certain factor-based tests are met.
    - Primary Factor: "special facilities" nearby
    - Secondary/Other Factors: requires significant cooperation between employer/employee to meet
- Exception: if no days worked in New York during the calendar year, then the convenience rule doesn't apply.

130

## CONSIDERATIONS – CONVENIENCE OF THE EMPLOYER - CONTINUED

- New York is sending audit notices to taxpayers who previously allocated all of their income to New York or whose allocation percentage decreased from 2019-2020.
- Some of the notices state:
  - *“We have determined that you were unable to access your office located in New York due to a temporary office closure resulting from Covid-19. If an employee’s assigned or primary work location was New York prior to Covid-19 temporary office closure, and the employer continues to maintain the New York office for the employee, the employer’s assigned and primary work location is still New York. The fact that the New York office is not used during the Covid-19 office closure does not affect the conclusion.”*

134

134

## CONSIDERATIONS – CORPORATE TAXES

- Employees traveling to a State can create nexus for corporate income taxes and sales and use taxes.
- Company may now have a filing obligation in State depending on the frequency and purpose of the travel.
  - New York
    - *Orvis* (N.Y. 1995)
      - New York Court of Appeals held that the State could require an out-of-state company to collect sales/use tax based on roughly 12 visits to the State by employees over a 3-year period.
  - Kansas
    - *In re Intercard* (Kan. 2000)
      - Kansas Supreme Court held that the State could *not* require an out-of-state company to collect sales/use tax based on 11 visits to the State by employees over a 4-year period.

136

## CONSIDERATIONS – EMPLOYEE

- Resident state can tax 100% of your income
  - Domicile Test – Permanent/Primary Home
  - Statutory Resident Test – 183 days and living quarters
- Nonresident states can tax income earned in that state.
  - Need to determine where income earned.
    - Generally done by a day count.

## COVID-19 CONSIDERATIONS

- A number of states have advised that during the COVID-19 stay-at-home orders, the presence of telecommuters in the State will not create nexus.
  - Caution: order can be limited to when stay-at-home order in place.
  - New Jersey's temporary suspension of nexus standards for temporary workers ended on September 30, 2021.
- Connecticut legislation recently enacted.
  - Cannot consider telecommuters for nexus purposes, BUT;
    - Only for 2020
    - Telecommuting must be solely due to COVID-19

## HOW TO PREPARE

- Companies should examine their presence based on employee locations to see if additional registrations/filings are necessary.
  - Use voluntary disclosures to clean-up any issues.
- Set a policy regarding work from home.
  - Ensure that employee's request in advance.

## DUE DILIGENCE: BUYER CONSIDERATIONS

- Buyer Considerations
  - Purchase business in tax-efficient manner
    - Is target a good S corporation for federal and state income tax purposes? F Reorganization? (see later slide)
    - If target is a limited liability company, has it made an S corporation election?
  - Tax liabilities resulting from Seller's pre-closing operations
    - i.e., current/deferred taxes payable, tax contingency reserves, FIN 48, transfer taxes, etc.
  - Seller has appropriately followed tax compliance procedures prior to closing
    - i.e., timely and accurately filed tax returns, complied with payroll requirements, accounting methods, completed and/or ongoing audits, accountant workpapers, prior deal documents, proper characterization of employees vs. independent contractors, etc.
  - SALT Issues
    - Sales, Use, and Payroll taxes with respect to State jurisdictions
      - Wayfair
      - Nexus for sales, payroll, and income taxes, etc.

## TAX STRUCTURING: STOCK SALE VS. ASSET SALE

- Tax Effect of Stock Sale (No 338(h)(10) or 336(e) Election)
  - Seller has capital gain/loss
  - Buyer has cost basis in stock
    - Not depreciable – when stock is sold, basis is recovered
  - SALT Implications
    - Generally sourced to residence of shareholder
- Tax Effect of Asset Sale (338(h)(10) or 336(e) Election)
  - Purchase Price Allocation (discussed later)
  - Seller has capital gain and/or ordinary income depending on the allocation
  - Buyer takes a cost basis in the assets purchased
  - Tax benefit is generally recovered through amortization and depreciation
  - SALT Implications
    - Generally sourced based on apportionment and allocation factor of target

## TAX STRUCTURING: BUYER VS. SELLER AND OTHER ISSUES

- Competing Interests Between Seller and Buyer
  - Seller prefers stock sale to ensure capital gains treatment, but Buyer gets no depreciation/amortization deduction
  - Buyer prefers an asset sale to maximize depreciation/amortization deductions
- Other Structuring Issues
  - Tax-Deferred Rollovers
    - Changes of Structure – valid S corp. remains in place
    - S corp. Issues – if concerns regarding compliance for S corp. status, effect an “F” Reorganization (see next slides)
    - Goodwill Anti-churning (Section 197)

## TAX STRUCTURING: BUYER VS. SELLER AND OTHER ISSUES

- Sale of Qualified Small Business Stock

- Eligible taxpayer may exclude up to 100% of their capital gain derived from the sale of qualified small business stock
- Qualified Small Business Stock Requirements
  - Domestic C corporation
  - Gross Asset Dollar Amount Threshold
  - Active Trade or Business
  - Disqualifying Redemptions
- Shareholder Requirements
  - An individual and any entity except a C corporation (pass-through entity rules)

## TAX STRUCTURING: ACCOUNTANT'S ROLE

- Accountant's Role

- Prepare spreadsheets to model after-tax return for client under various transaction structures. Accountants are typically closer to the facts than attorneys on items like tax basis, depreciation, etc., and will be in a better position to crunch numbers.
- Assist attorney in understanding the tax consequences and pressure points under various transaction structures.
- On buy side, determine after-tax cash flow of client's business to ensure client has properly modeled tax consequences under various transaction structures.

## ALLOCATION OF PURCHASE PRICE: CLASS OF ASSETS

### Class of Assets and how each Class of Asset is treated (Form 8594):

	Asset Type	Allocation Method
I	Cash and Cash Equivalents	The portion of the Purchase Price allocated to the Class I Assets will be based on the fair market value of the Class I Assets. The parties agree that the fair market value of the Class I Assets will be equal to the amount set forth on the Final Closing Balance Sheet.
II	Actively Traded Personal Property	The portion of the Purchase Price allocated to the Class II Assets will be based on the fair market value of the Class II Assets. The parties agree that the fair market value of the Class II Assets will be the amount set forth on the Final Closing Balance Sheet.
III	Accounts Receivable	The portion of the Purchase Price allocated to the Class III Assets will be based on the fair market value of the Class III Assets. The parties agree that the fair market value of the Class III Assets will be the amount set forth on the Final Closing Balance Sheet (net of any allowance for doubtful accounts).
IV	Inventory	The portion of the Purchase Price allocated to the Class IV Assets will be based on the fair market value of the Class IV Assets. The parties agree that the fair market value of the Class IV Assets will be the amount set forth on the Final Closing Balance Sheet.
V	Property Plant and Equipment; Other Tangible Assets	The portion of the Purchase Price allocated to the Class V Assets will be based on the fair market value of the Class V Assets. The parties agree that the fair market value of the Class V Assets will be the [adjusted tax basis OR book value] as of the Closing Date.
VI, VII	Intangible Assets; Goodwill; Going Concern Value	Remainder of the Purchase Price.

153

## ALLOCATION OF PURCHASE PRICE: CLASS OF ASSETS

- Class III - A/R
  - Accrual Method vs. Cash Method
    - Accrual – seller should not have gain (because seller should have full basis in A/R)
    - Cash - seller has ordinary income on amounts allocated to account receivables
- Class IV – Inventory
  - allocation to inventory in excess of tax basis is subject to ordinary income tax rates
- Class V – FF&E (tangible assets)
  - assets that have been depreciated may have to be recaptured at ordinary income rates
- Class VI & VII – Intangible Assets, Goodwill, Going Concern Value
  - Covenants Not to Compete
  - Careful consideration for self-created intangibles
- Non-compete allocation

## ALLOCATION OF PURCHASE PRICE: ACCOUNTANT'S ROLE

- Accountant's Role

- Identify assets within each asset class for Form 8594
- Assist attorneys in understanding the significance of different allocation methodologies
- Determine the acceptable tax implications to the client in an asset sale, 338(h)(10)/336(e), or sale of partnership interests, and communicate with attorneys so that attorneys can negotiate accordingly
- Review the purchase price allocation methodology reflected in the purchase agreement to ensure its accuracy
- Prepare allocation statement post-closing

## TAX GROSS-UPS

- Buyer and Seller might desire different transaction structures and allocation methodologies. Seller may be willing to accommodate the Buyer's desired structure in exchange for a tax "gross-up"
- Additional consideration paid to Seller from Buyer to put Seller in a tax-neutral position for accommodating Buyer's structure (i.e., make Seller whole)
- Particular Considerations:
  - Ordinary Income vs. Capital Gains
  - Impact of State Tax
  - 199A
  - Pass-Through Entity Level Tax
  - Cash vs. Accrual
  - Change in Accounting Method

## TAX ACCOUNTING METHOD: 481(a)

- 481(a) Adjustments
  - Relates back to due diligence and is typically uncovered during this process
  - Are seller's tax accounting methods accurate? Are changes needed?
- Potential Ramifications
  - Subject to the eligible acquisition transaction (Rev. Proc. 2015-13); allows acceleration of adjustment leaving the tax burden with the Seller
  - Otherwise, spread over 4 years, starting with the year Form 3115 is filed, leaving the tax effects of the change with the Buyer
  - Agreement may need to be modified to give Buyer the ability to prepare tax returns that are not consistent with the past practice of the company

160

160

## TAX ACCOUNTING METHOD: DEFERRED REVENUE

- **Deferred Revenue Treatment**
  - **Fragmentation Approach** – seller includes balance of deferred revenue and receives offsetting deduction in the amount of the deferred revenue. The fragmentation approach assumes a fictional payment from buyer to seller in the amount of the deferred revenue and a second fictional payment from the seller to the buyer to compensate the buyer for assuming the deferred revenue. Therefore, buyer is considered to acquire assets of target for cash and the assumption of the deferred revenue, and takes full basis in assets acquired (i.e., cash plus deferred revenue). Buyer is either subject to immediate tax on the second fictional payment or is entitled to deferral to the same extent as the original prepayment from the customer. Buyer deducts (does not capitalize) costs of fulfillment.
  - **Assumption Approach** – treated like a contingent liability. Seller includes as amount realized except in “rare and extraordinary case” when the contingent liability is not readily ascertainable. Seller usually takes an offsetting deduction or increase in basis. Buyer capitalizes the fulfillment costs in its basis when and if paid.
  - Pro-buyer – treated as a debt-like item for purchase price purposes
  - Pro-seller – included as part of target net working capital

161

161

## TAX ACCOUNTING METHOD: ACCOUNTANT’S ROLE

- **Accountant’s Role**
  - Determine if target has affected or is required to affect a change in accounting method and its impact on the transaction and the post-closing costs associated with the transaction
  - Calculate tax impact of a potential 481(a) adjustment so that council can negotiate how to account for it in the purchase agreement
  - Identify if any deferred revenue is part of the transaction

## PURCHASE PRICE ADJUSTMENTS: WORKING CAPITAL/OTHER ADJUSTMENTS

- Target Working Capital vs. Actual Working Capital
  - Working Capital = Current Assets less Current Liabilities
  - Target Working Capital is calculated pre-closing and negotiated between Buyer and Seller
    - Documented in purchase agreement
  - Actual Working Capital is calculated post-closing
    - If Actual Working Capital exceeds Target Working Capital, Seller receives additional consideration
    - If Target Working Capital exceeds Actual Working Capital, Buyer receives a refund of the purchase price
- Other Adjustments (similar to Working Capital)
  - Indebtedness
    - Estimated Indebtedness vs. Closing Indebtedness and inclusion of Income Taxes
  - Cash
    - Estimated Closing Cash Amount vs. Closing Cash Amount

## REVIEW – TYPES OF IRAs

- Contribution IRAs
  - Traditional – Pre-tax or after-tax depending on income level
  - Roth – After tax contribution, tax-free distribution
  - Spousal – For a spouse with no compensation income
- Rollover IRAs – transfer from a qualified retirement plan
  - Traditional rollover IRA
  - Roth rollover IRA
- Small business retirement programs – generally, direct contributions by the employer to an employee-owned IRA
  - Sep: Simplified employee pension – employee contribution only
  - Simple – Analogous to a small business 401(k) with employee contributions and employer matching contributions

171

## TRADITIONAL IRA – REGULAR CONTRIBUTION IRA

- Annual contribution opportunity
  - Deductible contribution, subject to income phase out
  - Distribution of pre-tax contributions and earnings includible
  - Tax-tax deferred growth
- Funding deadline – Unextended due date for federal income tax return (i.e., April 15)
- Deductibility depends on:
  - Employer retirement plan eligibility of IRA owner and spouse, if married
  - Income levels – Deductibility phase out for 2022 begins at
    - \$68,000 if single
    - \$109,000 if married filing jointly
  - Traditional IRA contribution limits

	2022	2023
Under age 50	\$6,000	\$6,500
Age 50 or older	\$7,000	\$7,500

## ROTH CONTRIBUTION IRA

- Annual contribution opportunity
  - After-tax contribution
  - Tax-free growth
  - Tax-exempt distribution
- Funding deadline – Unextended due date for federal income tax return (i.e., April 15)
- Roth annual contribution limit – Same limit as traditional contribution IRA, subject to income-related phase out
- 2022 phase out:
  - \$129,000-\$144,000 if single
  - \$204,000-\$214,000 if married/filing jointly

173

173

## ROLLOVER IRA

- Rollover from qualified plan or 403(b) plan
- Rollover contribution defers tax on plan distribution until distribution from IRA account
- Direct rollover avoids withholding tax (20%) on qualified plan distribution
- If qualified plan account balance > \$5,000, the participant has the right to stay in the qualified plan until death or plan's normal retirement age (usually age 65) (see IRC §411(a)(11))

174

174

## SHOULD I STAY OR SHOULD I GO?

- Rollover opportunity as fiduciary event for rollover IRA manager
- Decision factors: Stay or go
  - Protection of retirement benefits from creditors
  - Investment management
    - fees
    - fund availability
  - Plan loan repayment opportunity
  - Minimum required distribution – Delay opportunity for working participants who own less than 5% of the plan sponsor
  - Roth conversion opportunity

175

175

## ROTH CONVERSIONS

- Advantages of transfer of rollover to Roth rollover IRA or conversion of existing rollover IRA to Roth
  - No minimum required distributions
  - No penalty for early withdrawal of contributions (after 5-year hold)
  - No federal income tax at distribution
  - Cost: Prepayment of retirement income tax bill
  - Avoids:
    - Risk of future tax increases
    - Longevity risk of minimum required distributions
    - Tax decision with each retirement distribution
    - MRD income impact on taxability of social security benefits
    - MRD income impact on income-based Medicare premiums
    - Retirement income tax consequences to heirs

## PROPOSED LEGISLATION – POTENTIAL IMPACT ON ROTH AVAILABILITY

- “Secure Act 20” – Phased in delay of required beginning date to age 75:
  - Historically, RBD = age 70-1/2
  - Currently, RBD = age 72
  - 2023: increase to age 73
  - 2030: increase to age 74
  - 2033: increase to age 75
  - Prospects?
- Democratic legislative agenda, as originally proposed as part of “Build Back Better” legislation
  - Prohibition on Roth conversion by taxpayers with income > \$400,000 (single) or \$450,000 (MFJ)
  - Prohibition on “back door” Roth conversion
  - Limit on accumulation of IRA and defined contribution plan account balances > \$10 million
    - Mandatory distributions
    - Prohibition of new contributions
  - More aggressive required distributions where accumulation of IRA and defined contribution plan account balances > \$20 million
  - Restriction on IRA investment in private equity opportunities
